

PRIVACY-FIRST FILE SHARING

Share confidential files with full transparency and control.

For teams that want to share, manage and find files securely.
With strong access control, clear logs and fast onboarding.

Built in Belgium. Hosted in Europe.

GDPR aligned, audit logs, encryption and clear agreements.

01 · THE PROBLEM

Email, WeTransfer or the US cloud? Your confidential data deserves better.

1

Email attachments

Versions get lost, recipients are forgotten and you lose control the moment you hit send.

2

Google Drive, Dropbox and OneDrive

One drive for everything, weak permission controls and data residence outside Europe.

3

US CLOUD Act risk

American providers fall under extraterritorial law, also for data they host in the EU region.

02 · THE SOLUTION

Vaults: true network shares, for modern teams.

Separate workspaces per project, client or department. Permissions per Vault, audit trail per action, data in Europe.

03 · WHAT YOU GET

All the features you expect, in every plan.

● Encryption

Locally cached data is encrypted on the device.

● Theftguard

Protection when a device gets stolen.

● 30 days file history

Configurable on Private Clouds.

● FileLink and FolderLink

Secure links to files or folders, any size.

● Vault sharing

Full control, audit trail per Vault.

● Notifications

On changes inside a shared Vault.

● Auto sync

Across all devices that hold the same Vaults.

● Access control

Permissions per Vault, team and user.

04 · DATA RESIDENCE

Data residence in Europe, GDPR aligned.

Hosted in Europe, explicit data processing agreement, data minimisation and audit logs on every shared action. No US CLOUD Act exposure.

05 • LOOK AND FEEL

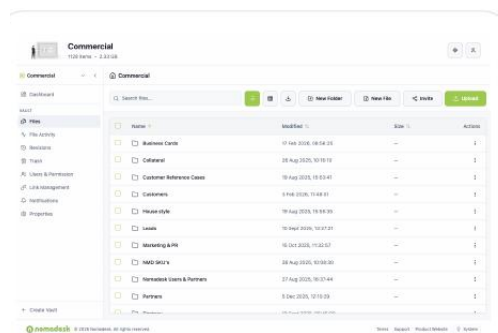

The new Nomadesk experience.

Four core screens that show how teams use Vaults every day: from the overview to file management and secure sharing.

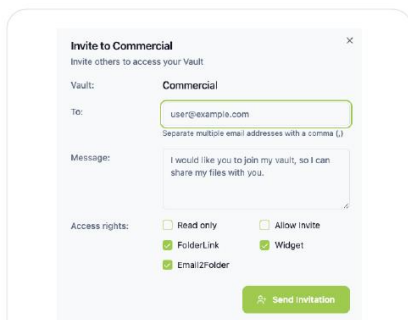

Vaults overview

All your workspaces at a glance. Favorites, shared and my Vaults neatly grouped, always within reach.

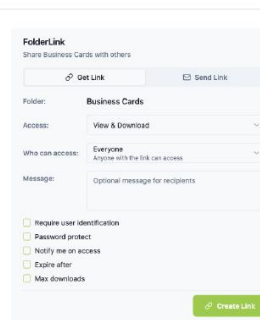

File management

Files, folders, versions and search in a familiar interface. File history, audit trail and permissions per Vault.

Vault dashboard

Invite colleagues or clients with fine-grained permissions. FolderLink, Email2Folder or Widget, you decide who can do what.

Secure sharing

FolderLinks and FileLinks with rules: identification, password, expiry and download limits. Outside your Vault, inside your control.

06 • TWO WAYS TO RUN

Hosted by Nomadesk, or self-hosted on your infrastructure.

Same Nomadesk technology, two deployment models. Pick what fits your compliance, scale and control.

NOMADESK HOSTED

Hosted by Nomadesk

Ready in two minutes, managed and updated by us.

- Ready in two minutes, instant to use
- Managed and updated by Nomadesk
- EU data residence, GDPR aligned
- Pay as you grow, linear and transparent
- Ideal for teams and SMEs

NOMADESK PRIVATE

Self-hosted, your infra

Containerized, runs on AWS, Azure, GCP or on-prem.

- Containerized, Kubernetes ready
- Runs on AWS, Azure, GCP or on-prem
- Full data sovereignty
- Multi-tenant, scales to thousands
- For enterprise and regulated sectors

NOMADESK HOSTED • UNIQUE PRICING MODEL

Pay as you grow, transparent per user and per TB.

One transparent rate, linear per user and per TB. One user and one TB start at just €14 per month. Add users and TBs as you grow, with full flexibility while keeping your setup. Fully hosted in Europe, GDPR aligned and with audit trail per action.
